# What is Psychodrama?

One can describe Psychodrama as a kind of laboratory for the exploration of psychosocial problems, but instead of physical equipment, the devices of role-play and one's own behavior are vehicles for experiments.

Neuroscience is validating what Psychodramatists have intuitively understood – that action methods, psychodrama, role play and experiential exercises reach deep into the weave of the brain and the body to transform consciousness.

The multi-sensory aspects of the method are friendly to the brain, and create safe experiences for your clients which alter neurobiology and make lasting changes in their lives.

As Zerka Moreno said, Psychodrama allows our experience to 'be first concretized and then reflected upon after it can be experienced'.

These exceptional interventions will enable you to help your clients make unconscious preferences conscious.

# Scope of learning

Psychodrama tools, techniques and concepts you will learn:

## **Sociometry**

How can you use it to warm up the group? And also 'scan' the group demographic and emotional profile.

## **Social Atom**

A sociometric pencil and paper exercise which involves making a diagram of significant relationships in a person's life.

## **Role Theory**

Moreno looked at development in terms of roles a person plays at a moment in time; and how interventions can change/expand roles for their benefit.

The process of repairing some roles, adding new ones and allowing others to move from the foreground to the background is part of the healing process in role-play.

## **Role-play Techniques**

Role Reversal, Role Interview, Doubling, Mirroring.

## **Empty Chair**

When the client is able to talk TO the other (boss, colleague, etc.) in the empty chair, instead of talking ABOUT her problems, it enables and entering and rooting in the here-and-now moment.

It also allows for the client to role reverse with the other's perspective by changing chairs if appropriate.

## **Sculpture**

The client is invited to express an emotion or 'stuckness' as a kind of "sculpture" with a sound; and then to change it into a desired state. This action movement brings an experience of change.

## **Magic Shop**

and other creative work to regain power.

# What some of our PCP graduates are saying

The past two years have been a rollercoaster, with the global pandemic.

Two things that kept me sane? Exercising daily, at 6 am. Psychodrama coaching practice with Vedadrama - I have to "thank" the pandemic, which enabled me to do this course while not physically in India.

I never pursued coaching in the past because I felt the approach was too prescriptive: checklists, smart questions, focus on the outcome no matter what.

With psychodrama, it is different. It does not even feel like a coaching session - we roleplay, use objects, wear masks, and use many creative methods. Very often, classes with Rashmi are the highlights of my week. I have never been so in touch with myself before, recognizing the triggers and adjusting my reaction to various situations.

*This course has truly supported me, giving me more tools to choose as a coach. I've become braver and more spontaneous working my clients. Rashmi and her co Trainer Vipul created a safe space, allowing us to experiment, practice, make mistakes, share, learn and grow.*

*Rashmi's management of the program and people has allowed me to really look inside myself, challenge and just be honest with myself. Her questions are curious and the angles she approaches from are so gentle, yet very effective.*

*My experience in the group has really opened my eyes to the endless possibilities to the benefits and uses of psychodrama. I highly recommend this program to every coach who wants to improve.*
